

C.A.S. of New England, Inc.

“Offering Business and Technical Solutions”

Presents another course in their technical series

‘Servicing SRS Systems’

Automotive Technical Workshop

Get a ‘handle’ on how SRS systems and their components operate and interact....

Understand SRS systems and deployment criteria, typical failures and be ready to take advantage of the increasing number of SRS systems on today’s vehicle population ...!

This is a 2 evening, theory and hands on seminar taught by a highly qualified instructor!

First Evening Includes Dinner Plus:

- Secondary Restraint Systems Operational Overview!
- Components involved in the typical SRS and how they are tested!
- Rules and Regulations regarding disposal of SRS components!
- Safety precautions that must be observed when servicing an SRS system!

Second Evening Includes Dinner Plus:

- Diagnostic Procedures when there is an SRS service light on!
- Service Procedures for deployed airbag situations!
- Reprogramming procedures for SRS / Airbag modules!
- Case Studies of multiple service situations covering SRS systems!
